ANALYTICAL CENTER OF BUSINESS RUSSIA

The Business Russia Department of Entrepreneurship and Corporate Governance at the Moscow State Institute of International Relations (MGIMO) launched a new educational MBA program “Entrepreneurship and Business Management”

It drew up road maps for national projects and outlined proposals in the following areas: “Housing and Urban Environment”, “Labor Productivity and Employment Support”, “Digital Economy”, “Ecology”, “Small and Medium-Sized Enterprises and Support for Individual Entrepreneurial Initiative”

It supported the holding of 16 meetings on key sectors of economy in the framework of the “road map” development carried out by the Interdepartmental Working Group to ensure sustainable economic growth in the non-resource sector of the economy. The work is carried out according to the Instruction of the President of Russian Federation No. 863 of May 24, 2018

It supported a number of meetings on law enforcement practices in the scope of the implementation of Federal Law No. 214 of December 30, 2004. Following these meetings, the Ministry of Construction Industry, Housing and Utilities Sector of Russia was requested to develop a draft federal law based on the proposals put forward and to prevent insurance payments being raised to 6%

Analytical Center played an active role in increasing business safety in terms of reducing the criminal prosecution of entrepreneurs

Analytical Center held jointly with Rostec and MGIMO two annual Stolypin Forums

Analytical Center took part in the realization of 10-15 cluster projects in key industrial areas in order to stimulate economic development. This work is ongoing in accordance with the order of the Russian President №922 from May 22, 2019

Business Russia organization is always open for collaboration and we welcome every opportunity to work together!

Members of our organization are open to explore new investment proposals and projects, primarily on the territory of the Russian Federation.

Referring to the declared topics of the forum, we have the most interest in the implementation of the joint projects for processing timber into high-readiness products, including the construction industry.

Our organization is open to consider the food industry production projects that take place on the territory of the Russian Federation.

Our current proposal: An organization located in Primorsky Krai with a wide range of potential opportunities is open to consider new initiatives in creating a joint production in processing the wild and fish raw materials into high-readiness products intended for export.

Thank you for your attention!

Please feel free to reach out to me with any questions or proposals!
