## **Concept Paper**

### **CICA Industrial Poverty Alleviation Model Exchange and Training Workshop**

#### **1. Background**

Anti-poverty is the common mission of human kind in the development of society. Eliminating poverty, improving people's livelihood and ensuring that the dividends of reform and development can benefit the majority of people are the main goals of China's targeted poverty alleviation in the new era. Since 2013, China's "targeted poverty alleviation" campaign has become the largest, most powerful, most influential and most effective poverty reduction campaign in the world. In the field of poverty reduction, a world-wide recognized means is to lift poor people out of poverty through the development of industries. In the battle against poverty in China, industrial poverty alleviation is also listed as the top priority of targeted poverty alleviation measures of "one group of five". As a fundamental measure to promote steady and sustainable poverty alleviation, lots of industrial poverty alleviation models have emerged in practice. Sharing the experiences of global poverty reduction, summarizing poverty alleviation models of different industries in different countries, improving the exchanges within Conference on Interaction and Confidence Building Measures in Asia(CICA ) member states, introducing the application of good industrial poverty alleviation models has great practical value for CICA member states.

## **2. Main content**

The main content of this project includes three parts: Industrial poverty alleviation models and exchange of applied technologies, the training of relevant personnel for industrial poverty alleviation, industrial poverty alleviation mechanisms, models, experiences and China's industrial poverty alleviation seminars.

**The first part is to carry out the exchange of industrial development models and applied technologies with the main goal of promoting the sound development of poverty alleviation industries.** It mainly includes the choice of industrial development model, the exchange and study of management, production, processing, marketing and other technologies. It will promote the sound development of the industry, and strengthen the exchange, application, promotion of adaptable technologies in related industries among CICA member states, so as to choose suitable options for CICA member states, provide a suitable communication platform for the industrial poverty alleviation models and improve the effectiveness of industrial poverty alleviation.

**The second part focuses on the training of relevant personnel for industrial poverty alleviation. The workshop will** organize well-known experts at home and abroad to conduct training for no less than 30 young researchers, entrepreneurs, cooperative leaders and farmers from CICA member countries on the topics of industrial poverty alleviation adaptability model selection, industrial development capacity enhancement, industrial poverty alleviation mechanism and effectiveness

evaluation, cross-regional industrial poverty alleviation cooperation. It will also establish a platform for industrial, academic and research exchanges and cooperation in industrial poverty alleviation in CICA member countries, and form a stable team, improving research and analysis capabilities. The purpose of the workshop is to provide multi-faceted support for the sound development of industrial poverty alleviation and the promotion of cross-regional industrial poverty alleviation cooperation among CICA member states.

**The third part is to discuss the industrial poverty alleviation mechanism, model and experience of CICA member countries and also discuss China's industrial poverty alleviation.** Internationally renowned poverty reduction organizations such as the World Bank, political, business, and academic representatives from various CICA member countries will be invited to discuss effective models and development directions for industrial poverty alleviation. At the same time, in the form of special research, we will focus on the classic cases of industrial poverty alleviation in China. We plan to select 10 representative counties in Yunnan, Guizhou, Chongqing, Shaanxi, Xinjiang and other 5 provinces (autonomous regions and municipalities) to conduct industrial poverty alleviation research and summary, and analyze the effective model, implementation path and policy choice of industrial poverty alleviation. In addition, through sorting out the policy system, industrial model and poverty reduction effect of China's industrial poverty alleviation, we comprehensively display the development context of

China's industrial poverty alleviation, the impact on the rural economy, and the impact on poverty reduction from the three sections, which are the industry section, policy section and achievement section. By printing research reports and producing CDs of typical cases, spreading good practices, we can promote the sharing of China's industrial poverty alleviation experience among CICA member states, and promote industrial poverty alleviation cooperation within CICA economies.

### **3.Goals and tasks**

This project aims to carry out the exchange and sharing of industrial development models and application technologies with the main goal of promoting the sound development of poverty alleviation industries. We also aim to train a group of young researchers, small and micro entrepreneurs, cooperative leaders and farmers in the field of industrial poverty alleviation to promote CICA member states achieve better results in industrial poverty alleviation. In addition, we will discuss industrial poverty alleviation mechanisms, models, and experiences to provide theoretical support for industrial poverty alleviation. At the same time, through field research, case studies and experience summaries of China's typical industrial poverty alleviation models, we plan to publicize the successful practices, experiences and effects of China's industrial poverty alleviation, and increase China's influence in driving regional poverty alleviation.

### **4.Organizer**

**Sponsor:** Institute of Agricultural Information, Chinese Academy of

Agricultural Sciences
