NATIONAL DEVELOPMENT INSTITUTE

Requirement: implementation of international standards in terms of regulation of Industry 4.0

Decision: compliance with the regulatory environment and adaptation of standards using international experience.

Initiative: obtaining the status of the National Institute for the Development of Industry 4.0.

CONNECTIVITY

Work is underway to promote OneWeb to increase the availability of high-speed internet in remote settlements and industrial facilities.

AIFC Tech Hub, together with UNICEF, intends to implement a project to study and test new sustainable connectivity models, namely a technical solution for the redistribution of internet connectivity by schools or organizations.
