Draft Concept paper on cooperation among the CICA Member States in the area of Combating Illicit Drugs

*Proposal by the Islamic Republic of Iran
As the Coordinator in the priority area of “Combating Illicit Drugs”
December 2023*

I. Background

The Conference on Interaction and Confidence Building Measures in Asia (CICA) has adopted the CICA Catalogue of Confidence Building Measures, hereafter referred as the Catalogue (updated in October 2021), and has agreed to the realization of these guidelines in practice on bilateral and/or multilateral basis as voluntarily agreed upon. Security, as one of the core ideas behind the CICA, is the main concern of all countries, not only in Asia, but at the global level. The Member States, irrespective of their political or ideological orientation, need to strengthen their security both individually and collectively. On this basis, the CICA has so far produced a number of documents in which the ways and means of strengthening regional security and cooperation have been agreed. One of these is the Catalogue where the Member States in para 2.2.12 have agreed to “exchange information on the measures taken to curb illicit drug trafficking”.

Previous concept paper in this area was adopted in August 2008 and serves as a basis for the current updated version.

On this basis, the Member States:

1. Recognizing the severe threats posed by illicit drug trafficking to the security and stability of Asia, particularly in countries sharing borders with major drug-producing regions;
2. Emphasizing the need to implement Confidence-Building Measures (CBMs) to address and mitigate the impact of illicit drug trafficking in alignment with the specific needs and challenges faced by Member States;
3. Underscoring the imperative of robust cooperation among Member States to combat drug trafficking, including intelligence sharing, joint law enforcement operations, and capacity building;

4. Highlighting the escalation of organized and transnational forms of drug-related crimes, which not only undermine public safety and stability but also contribute to financing terrorism, posing a direct threat to regional security and national interests;
5. Attaching importance to the implementation of the “Single Convention on Narcotic Drugs 1961” as amended by Protocol 1972, “Convention on Psychotropic Substances 1971” and “Convention against Illicit Traffic in Narcotic Drug and Psychotropic Substances 1988”;
6. Being alarmed by the serious threat posed by illicit drug production and trafficking to the security of the region and its negative impact on political, social, economic and cultural life of the CICA Region;
7. Affirming a strong commitment to addressing the root causes and conducive conditions of illicit drug production and trafficking, with a particular focus on countries exposed to more damage and based on national context and vulnerabilities, in accordance with the principles and obligations set forth in international law and treaties;
8. Desiring to take appropriate steps to combat such transnational criminal activities as money laundering of the proceeds derived from illicit drug production and trafficking narcotic drugs and chemical precursors; and disrupting the financial networks associated with illicit drug production and trafficking, which directly affect countries security and stability;
9. Determined to provide, when possible, access to treatment, social reintegration, rehabilitation and aftercare for drug users;

Reached the understanding regarding the procedure of carrying out cooperation and coordination among themselves, so as to combat illicit drug production and trafficking subject to the respective legislations of their countries.

II. Areas and Forms of Cooperation

Cooperation among the Member States may include, inter alia:

1. Facilitating provision of mutual legal assistance in investigations, prosecutions and judicial proceedings in relation to illicit drug production and trafficking and related crimes;
2. Reducing drug demand and supply;

3. Taking joint measures to suppress transportation, use of drugs and illegal diversion of precursors as well as to eliminate illicit drugs supply sources, cultivation and drug producing laboratories;
4. Cooperation on alternative drug substitutive agricultural development for the deterrence of production as well as the cultivation of drugs. Enhancing common efforts on prevention of conditions conducive to spread of production and cultivation of drugs.
5. Strengthening of cooperation in the field of combating illicit drug production and trafficking in regional and international arena;
6. Exchange of information on the methods of detection and seizure of concealed drugs, as well on the 'modus operandi' used by drug traffickers;
7. Sharing information on new technological equipment and modern technologies, applied to detect illicit drugs and increase capacity-building activities against illicit drug production and trafficking such as experts' training courses;
8. Exchange of information on new types of drugs, including synthetic drugs and amphetamine type stimulants;
9. Holding training workshops and meetings for representatives of the relevant bodies involved in the drug control, preventive measures, treatment and rehabilitation;
10. Promoting cooperation in the field of legislation and exchange of legal information among the Member States in accordance with international treaties;
11. Undertaking joint scientific research works on drug control;
12. Raising public awareness and disseminating information on the risks of drug consumption;
13. Implementation of evidence-based drug policies and harm reduction strategies including sharing best practices in harm reduction interventions, evaluating the effectiveness of different drug policies, sharing lessons learned from successful harm reduction initiatives;
14. Identifying and engaging potential donors and aid organizations;
15. Establishing mechanisms for financial assistance and grant funding and collaborating with international partners to secure donations or subsidized access to modern technologies.

III. Confidentiality of information and documents

Confidentiality level of information and documents provided within implementation of the present Concept Paper is defined by the providing party. Information and documents should not be transferred to a third party without prior written authorization of the providing party.

IV. Meetings

In order to review the situation concerning the illicit drug production and trafficking and progress made in implementation of this Concept Paper, the Member States might meet whenever necessary on voluntary basis.

V. National Drug Control Focal Points

It is proposed that the Member States might voluntarily inform the CICA Secretariat about their respective drug control focal points. The Secretariat will maintain and regularly update the list of focal points and disseminate this information among the Member States.

VI. Implementation

This Concept Paper will form the basis for conducting further deliberations aimed at elaborating an Action Plan. Furthermore, Member States are encouraged to organize relevant seminars, workshops and conferences guided by Article II of the current Concept paper, in close coordination with the CICA Secretariat and the Coordinator in the priority area of “Combating Illicit Drugs”.
